EDUCATION

Georgia Institute of Technology

PhD in Computer Science

Atlanta, GA

Aug. 2024 - Expected May. 2028

- Advised by Prof. Thomas Plötz. Research areas: human activity recognition, multimodal sensing, data generation, LLM agents

Georgia Institute of Technology

B.S. in Computer Science (Theory & AI), B.S. in Physics | GPA: 4.0

Atlanta, GA

Aug. 2021 - May. 2024

EXPERIENCE

Graduate Research Assistant

Georgia Institute of Technology

Aug. 2024 - Present

Atlanta, GA

- Developed **AgentSense** (AAAI '26): LLM-guided agents simulated **18** personas across **22** home layouts to generate **250 days** of privacy-preserving smart-home sensor data; pretraining on it beat baselines on **5** real HAR datasets.
- Built **EduGage** (IMWUT '26), fusing **8** synchronized physiological, motion, and eye-tracking signals from 16 participants to reach **83.75%** within-1 engagement accuracy, outperforming foundation-model and LLM baselines.
- Benchmarked virtual IMU generation against classical augmentation over **100** activities and **22** body locations, across 3 HAR benchmarks and 4 model architectures.

Machine Learning Engineer Intern

BehaviorAI

Aug. 2026 – Dec. 2026

Brooklyn, NY

Research Intern, Sensor Machine Learning

Nokia Bell Labs

Jun. 2025 – Aug. 2025

Cambridge, United Kingdom

- Fused IMU and PPG by signal quality at runtime for cardiovascular sensing, distilling from ECG at training.
- Repurposed SwAV clustering for cross-modal distillation, with assignment entropy as uncertainty (**UK patent**).

Undergraduate Research Assistant

Georgia Institute of Technology

Aug. 2022 – May 2024

Atlanta, GA

- Developed **IMUGPT** (IMWUT '24), generating virtual IMU data from text via LLMs and motion synthesis; motion filtering and diversity metrics cut generation effort by **over 50%**.
- Evaluated alternative data-collection strategies for wheelchair transportation mode detection, reducing reliance on recruiting wheelchair users (Best Paper Nomination, ISWC '24).
- Built a personalized emotion-recognition system using wearable IMUs and virtual motion data for pretraining.
- Built **FingerSpeller** (ASSETS '23), a camera-free ASL fingerspelling system reaching **91%** character accuracy from smart rings; released a 42,288-letter dataset.

Machine Learning Research Intern – SULI

Argonne National Laboratory

May 2023 – Aug. 2023

Lemont, IL

- Accelerated GNN training for ocean simulation by **213×** using distributed training across **256 GPUs**.
- Expanded GNN training data via inverse-distance-weighted interpolation for larger-scale ocean simulation.

AWARDS

NSF Graduate Research Fellowship (GRFP)	2024
Three-year \$37,000 annual stipend plus \$16,000 yearly tuition allowance for outstanding STEM graduate students	
Georgia Tech President's Fellowship	2024
Awarded to select doctoral students for exemplary scholarship and innovation. \$5,500 annual stipend, renewable for three years	
Georgia Tech Institute Fellowship	2024
Georgia Tech's most prestigious graduate fellowship, awarded to a select few President's Fellowship holders. \$2,000 annual stipend	
Provost's Academic Excellence Award	2024
Top graduating senior from Georgia Tech's College of Computing. \$2,000 award	
President's Undergraduate Research Awards (Salary and Travel)	2023
\$2,500 to conduct undergraduate research with Georgia Tech faculty, plus a travel grant	

TECHNICAL SKILLS

Languages: Python, C/C++, Java, Bash, LaTeX
ML & Deep Learning: PyTorch, TensorFlow, Keras, scikit-learn, NumPy, OpenCV, Ray Tune
Infrastructure: Distributed multi-GPU training, CUDA, Docker, Git

MENTORED STUDENTS

5 masters and 5 undergraduate students: Amitrajit Bhattacharjee, Elizabeth Bruda, Jocelyn Heath, Archith Iyer, Yaqi Liu, Ruijia Peng, Hrudhai Rajasekhar, Kalyan Salkar, Zijun Wang, Lizhe Zhang
